

(1→4) cellobiose

lactose $\beta(1 \rightarrow 4)$

HMG-CoA

IPP
isopentenyl
pyrophosphate

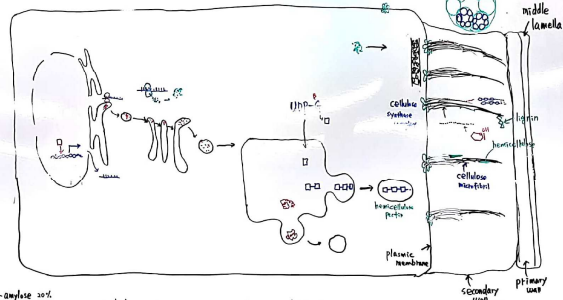

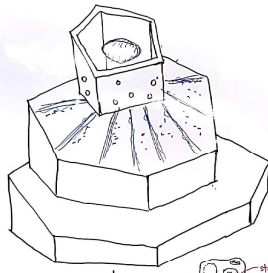

Ti

10 steps of life

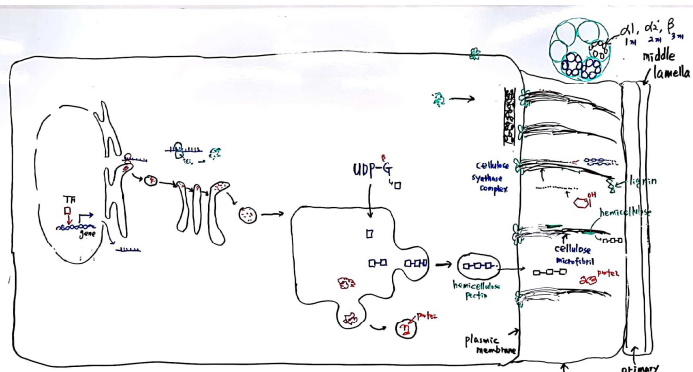

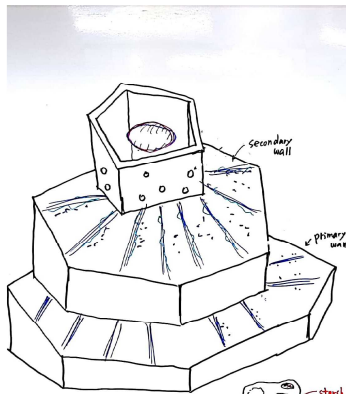

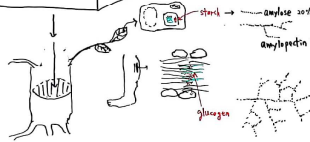

1. prokaryotic 원핵세포
2. Eukaryotic 진핵세포
3. photosynthesis 광합성
4. Multicellular 다세포
5. Cambrian explosion of life
5억4천
6. green plant on land
7. Vertebrate on land
8. flower plant
1.3억
9. human society based on agriculture
10. Industry revolution base on fossil

10 steps of life

1. prokaryotic 원핵세포
2. Eukaryotic 진핵세포
3. photosynthesis 광합성
4. Multicellular 다세포
5. Cambrian explosion of life 1994
6. green plant on land
7. Vertebrate on land
8. flower plant 199
9. human society based on agriculture
10. Industry revolution base on fossil

Cholesterol → progesterone → testosterone
cortisol
aldosterone

Cholesterol → progesterone → testosterone
cortisol
aldosterone
